Art Unit: 2827

This application contains claims directed to the following patentably distinct species of the claimed invention: The species wherein the plate is made of metal and ceramic.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from the species wherein the plate is made of metal and ceramic for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 8 are generic to the species wherein the plate is made of metal and ceramic.

This application contains claims directed to the following patentably distinct species of the claimed invention: The species wherein the electrode comprises a solder ball, a pin electrode, a coil-spring electrode, a straight column shaped electrode, and a center-pinched column shaped electrode.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from the species wherein the electrode comprises a solder ball, a pin electrode, a coil-spring electrode, a straight column shaped electrode, and a center-pinched column shaped electrode for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 18 and 43 are generic to the species wherein the electrode comprises a solder ball, a pin electrode, a coil-spring electrode, a straight

column shaped electrode, and a center-pinched column shaped electrode.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or

admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any telephone inquiry of a general nature or relating to the status (MPEP 203.08) of this application or proceeding should be directed to Group 2800 Customer Service whose telephone number is 703-306-3329.
